WHERE COMMUNITY GROWS

This year we celebrated the ways in which park and recreation professionals are central to growing and sustaining healthy, prosperous and resilient communities.

We know and are driven by some powerful truths:

- Park quantity, quality and accessibility are predictors of overall well-being.¹
- Climate-ready parks provide proven, cost-effective and sustainable environmental solutions.²
- A lack of green space correlates to a 33 percent higher rate of physician-diagnosed depression.³

With the support of our partners, NRPA invested more than $3.6 million into nearly 200 communities in 2023 to advance equitable and resilient parks, pollinator protection, youth sports, older adult physical activity programs and Community Wellness Hubs — trusted gathering places where all people can connect to social services. We also formed strategic partnerships with nongovernmental organizations and federal government agencies, like MENTOR and the National Park Service, to advance our mission and extend our reach.

The 2023 NRPA Annual Conference brought together more than 8,000 park and recreation professionals, suppliers and allies to learn and create community. Through all that we do, NRPA is ensuring that the people who strengthen and grow our communities have the resources, funding, education and research they need and deserve, as well as a community of their own.

Parks and recreation has the power to connect and heal our communities from the ground up. NRPA works every day to champion the people who create healthy, equitable and resilient communities.

You can help. Let’s grow community together.
