Toolkit Purpose

This toolkit is meant to make promoting and celebrating Family Health & Fitness Day — Saturday, June 8, 2024 — in your community a little easier! It is designed to help you generate positive media coverage and support for your Family Health & Fitness Day activities and ultimately the work of your agency and the benefits you bring to your community.

This kit includes template media materials, such as:

- Media alerts for special events
- Press releases for before and after the event
- Fact sheets
- Social media posts for before and after the event
- Sample web and email copy that you can use in your publications
- A timeline and checklist of activities

Feel free to customize these materials with localized information, quotes and details that best meet your needs.

When using social media, please make sure to tag NRPA in your Facebook, X and Instagram posts and use **#NRPAFamilyHealthDay**.

Don't forget, we want to see your successes too — register your event with NRPA, send us photos, videos and stories from your Family Health & Fitness Day events and the creative ways you have used the marketing materials so we can amplify your work!

If you have questions or need further assistance, please don't hesitate to contact me:

Cina Makres (she/her)
NRPA Program Specialist
cmakres@nrpa.org

We hope this toolkit helps you generate great support for Family Health & Fitness Day!

2024 Family Health & Fitness Day Fact Sheet

- NRPA's Family Health & Fitness Day — celebrated the second Saturday in June each year — promotes the importance of parks and recreation in keeping communities healthy. This year it lands on June 8, 2024.
- Agencies everywhere are encouraged to participate by inviting families to get active and healthy at their local park or recreation center, or by safely hosting an event — such as a health and wellness fair or family fun run/walk — on Saturday, June 8. Members of the community (e.g., healthcare and public health partners), local businesses and other community-based organizations also are encouraged to participate, even as sponsors.
- Various research studies have confirmed that local parks, recreation programs, green spaces and access to the outdoors are critical for creating healthy, active and resilient communities. Parks and recreation plays a critical role in supporting our mental and physical well-being, and Family Health & Fitness Day is a great opportunity to celebrate this. The key messaging, which can be found in the next section, includes research and articles that showcase these benefits.
- In addition to celebrating at your local park and recreation agencies on June 8 with events, you can get involved in Family Health & Fitness Day by:
 - Using this toolkit to promote your health and wellness programs and activities via digital channels and local media
 - Using the social media images and #NRPAFamilyHealthDay on your social media channels leading up to and on Saturday, June 8
 - Highlighting the ways your agency helps your community stay healthy on your website, social media channels and promotional materials. Examples could include:
 - **Innovative programming provided across multiple dimensions of well-being**
 - **Mental health benefits of visiting your parks and participating in your programs**
 - **Physical activities and experiences visitors can participate in**
 - **Connections to other essential health service providers in your community**
- Join the conversation on NRPA's [Facebook](#), [X](#) and [Instagram](#) using #NRPAFamilyHealthDay.
- [Register your event with NRPA!](#)
- For additional information, visit nrpa.org/events/family-fitness-day/.

Research to Share

There is a growing body of evidence that shows how parks and recreation supports health and wellness. Below is a list of messaging and articles that you can pull from to show how beneficial parks and recreation is to your local community — and the many reasons to celebrate it. These can be shared on your social media channels or included in your communications Family Health & Fitness Day. Feel free to continue to use them in the future!

- Living close to parks and other recreation infrastructure is consistently linked to higher physical activity levels for both adults and youth. Moreover, parks provide a connection to nature, and studies demonstrate that connecting to nature relieves stress, tightens interpersonal relationships and improves mental health.
- Through the many spaces, programs and services that park and recreation agencies manage, they have the unique power to advance NRPA's [Seven Dimensions of Well-Being](#).
- Parks and recreation and the professionals who support it are essential. Here are [five statements with supporting research](#) that showcase the fundamental role of parks and recreation, including how parks and recreation promotes health and wellness.
- Local park and recreation agencies are uniquely suited to serve as Community Wellness Hubs, which connect all members of the community to programs and services that advance health equity, improve health outcomes and enhance quality of life. NRPA's [Community Wellness Hubs – A Toolkit for Advancing Community Health and Well-Being Through Parks and Recreation](#) contains evidence, resources and case studies to provide park and recreation professionals with ideas and guidance to advance parks and recreation as Community Wellness Hubs. [This video series](#) provides an opportunity to learn how park and recreation professionals can begin to implement a hub model in their communities to address food security and nutrition literacy.
- According to guidance from the [Community Services Preventive Task Force](#), park and recreation professionals and public health professionals play vital roles in ensuring all communities have equitable opportunities to get active. [The Active Parks! Increasing Physical Activity Through Parks, Trails, and Greenways](#) recommendation states that combining (1) essential **infrastructure improvements** with (2) **additional activities** like community engagement, programming, public awareness and other access enhancements can increase physical activity and the use of parks, trails and greenways. NRPA's [Active Parks! Implementation Guide](#) provides an overview of the recommendation, as well as a step-by-step process for equitable implementation.
- According to NRPA's [2023 Engagement With Parks Report](#), more than 280 million people in the United States visited a local park or recreation facility at

least once during the past year, and 9 in 10 people agree that parks and recreation is an important service provided by their local government.

- According to the [January 2024 NRPA Park Pulse](#), 93 percent of U.S. adults are prioritizing four top activities in the new year. The activities include being physically active, improving mental health and self-care, being in nature, and learning a new skill — all which can be accomplished at a local park or recreation facility.
- Local park and recreational opportunities shape a neighborhood. According to the [October 2023 NRPA Park Pulse](#), 84 percent of U.S. adults indicate proximity to high-quality parks, playgrounds, open spaces or other recreational facilities is important when choosing a place to live.
- According to the [August 2023 NRPA Park Pulse](#), 90 percent of U.S. adults want park and recreation agencies to provide programs specifically for older adults, including outdoor activities, indoor activities, physical activities and educational opportunities.
- According to the [June 2023 NRPA Park Pulse](#), 83 percent of U.S. adults believe it is important to have access to indoor and outdoor recreation areas, classes and activities in order to lead a healthy lifestyle. NRPA's [2023 Agency Performance Review](#) report shows 81 percent of park and recreation agencies offer fitness classes and 80 percent offer health and wellness education.
- According to the [2021 NRPA Out-of-School Time \(OST\) Report](#), more than 4 in 5 park and recreation agencies offer OST programs. The top benefits of OST programs include childcare for working parents and/or caregivers, offering children a safe place outside of school hours, opportunities to engage in physical activity through play, exercise and sports, social opportunities and chances to connect youth to peers.
- According to NRPA's [Parks and Recreation: Advancing Community Health and Well-Being](#) report, 9 in 10 park and recreation agencies take specific actions to ensure their health and wellness programs and services promote health equity.
- The impacts of adverse childhood experiences and trauma on youth mental and behavioral health outcomes are rising concerns in communities across the country. Local park and recreation agencies provide ample opportunities for youth to build positive social connections. Through the [Mentoring in Parks and Rec](#) initiative, NRPA supports agencies in their efforts to build effective and evidence-based mentorship programs that connect youth with caring and compassionate mentors, while also strengthening connections across their community.

- As providers of — and connection points to — public health services and community conditions that protect and promote health and well-being, parks and recreation plays a vital role in addressing substance use and mental health disorders. [Parks and Recreation: Addressing Substance Use and Mental Health Disorders](#) provides resources to support park and recreation professionals as they address substance use and mental health disorders in their communities.
- [The Health Benefits of Parks and Their Economic Impacts](#) is an NRPA-funded research report written by Mychal Cohen, Kimberly Burrowes and Peace Gwam of the Urban Institute; it explores some of the many benefits that parks provide.
- Our nation’s leading public health experts endorse parks and recreation as an effective strategy for improving physical, mental and social well-being. An [advisory report](#) released by the U.S. Surgeon General, titled “*Our Epidemic of Loneliness and Isolation*,” found that before the coronavirus (COVID-19) pandemic, about half of U.S. adults reported experiencing measurable levels of loneliness. In response to this national health crisis, the report recommends strengthening social infrastructure, including parks, libraries and public programs.
- Parks improve the environment and help protect communities from the growing impacts of climate change including extreme heat, flooding, poor air quality and light pollution.
- The [Physical Activity Guidelines for Americans Midcourse Report: Implementation Strategies for Older Adults](#) recommends community interventions, including parks, greenways, trails and other public spaces to increase physical activity of older adults.

2024 Family Health & Fitness Day Media Outreach – “How To”

The following are general guidelines for conducting media outreach for special events you may be hosting on June 8 for Family Health & Fitness Day.

Leveraging the Press Release

To announce your involvement in Family Health & Fitness Day and what activities will be taking place on June 8, customize the Pre-Event **Press Release** template on page 11 and distribute it to appropriate reporters, bloggers and/or broadcast media in your local area.

1. You’ll want to send the release out at the end of May or beginning of June to journalists and reporters and to TV/radio stations approximately two days before an event you want them to attend.
2. Search online for the “**news desk**” emails and/or submission guidelines of your local TV stations and radio stations.

3. Search for contact information for reporters and publications in your local area that cover topics related to parks, the outdoors and community affairs. Be sure to pitch to only one reporter from each newspaper/print agency. It is a good idea to review the stories the reporter writes to get a feel for what they are most interested in so that you can tailor your outreach to meet their interests. Most reporters prefer email.
4. Search online for bloggers, social media influencers or health and wellness influencers in your area and invite them to your event; these social media journalists are powerful influencers and can be instrumental in spreading the word about the events you have going on for Family Health & Fitness Day.
5. Once you have your list together, prepare your pitches. Make sure you tailor the pitch for the type of outlet and personalize it as much as possible for the journalist or blogger you are contacting. Keep it brief.
6. Customize the press release template with the appropriate information, as marked with brackets and yellow highlight, EX: [NAME].
7. You can distribute your press release on any newswires you subscribe to or use regularly. This will give you added visibility in newsrooms and with online media.
8. In addition to wire distribution, reach out directly via email to journalists and bloggers. Insert your pitch and paste the text of the press release into the email.
9. Put an engaging tagline or sentence in the “Subject” line of the email to entice reporters.
10. Once you have sent your release, follow up with a phone call to reporters. Be sure to have a short pitch ready and be prepared to answer questions about why your event or story is a “must see/cover.”

Inviting Press to Your Event With the Media Advisory

If you are hosting a special event on June 8 and would like to invite reporters to cover your event onsite:

1. It's a good idea to send Media Advisories to journalists and reporters at least two weeks in advance and to TV/radio stations approximately two days before an event.
2. Search online for the “**news desk**” emails and/or submission guidelines for your local TV stations and radio stations.
3. Search for contact information for reporters and publications in your local area that cover topics related to parks, the outdoors and community affairs. Be sure to

pitch to only one reporter from each newspaper/print agency. Most reporters prefer email.

4. Consider inviting local bloggers to your event as well or creating a special opportunity for them to come out and get a sneak peek of your Family Health & Fitness Day event. These social media influencers can be very helpful in spreading the word about the events you have going on for Family Health & Fitness Day.
5. Customize the media alert template with the appropriate information, as marked.
6. Write a brief one-paragraph pitch to the reporter and attach the Media Advisory as a PDF or Word document, or paste the text into the email, beginning with “Media Advisory.”
7. Put an engaging tagline or sentence in the “Subject” line of the email to entice reporters.
8. Once you have sent your Media Advisory, follow up with a phone call to reporters you are particularly interested in having attend. Be sure to have a short pitch ready and be prepared to answer questions about why your event is a “must see.”
9. Consider sending a post-event press release to generate coverage after the event. It is a good idea to send this immediately following the event or the next morning. This often means drafting most of the release in advance and adding a few pertinent details afterward. We’ve included a template for a Post-Event Press Release on page 12 that you can use.
10. Reach out to the reporters whom you previously contacted. If you can, offer footage from the event or high-resolution photos (cellphone photos are great, too!). To learn more about photographing your event/park, check out [this article](#) from the May 2021 issue of *Parks & Recreation* magazine.

Tips and Tactics

- Remember that timeliness is a big factor in press coverage.
- Try to keep the message brief. One page is best — do not exceed two.
- Don’t forget to add complete contact information. If a reporter is interested, they may wish to email or call you with questions or requests for clarification.
- Write using short paragraphs and sentences, and in the third person — don’t refer to yourself as “I” or “we,” except in a direct quote.

- Avoid testimonials or other promotional language. A press release is news — not advertising.
- Don't be discouraged if you do not receive interest, or if a reporter doesn't make it to your event. Reporters receive hundreds of press releases every day and cover news based on many factors (e.g., timeliness, the amount of current events taking place/space, editor approval and capacity). It's never personal.
- If a reporter does email or call with interest, be sure to respond in a very timely manner.

***Let us know if your Family Health & Fitness Day event is covered in the news!
Send links of online coverage to cjones@nrpa.org so we can share it.***

2024 Family Health & Fitness Day Evaluation Metrics

Evaluating the success of your event is important for showing the effects of your hard work and advocating for the general impact of parks and recreation on community health perceptions and behaviors.

The data you collect can be used to support your case for securing future funding and support from city leadership, community members, sponsors and partners. While documenting numbers that carefully describe the event is crucial for measuring success, collecting and sharing stories from a multitude of perspectives adds a powerful and relatable color that demonstrates the heart of the experience.

Stories provide context and inspiration for your audience that will form a deeper memory of, and connection to, your success. This section provides a few methodologies and metrics that can be used to measure your Family Health & Fitness Day events using numbers and descriptions, as well as the impact of your events with stories.

Describing and Measuring Event Implementation, Promotion and Reach

While numbers and program descriptions do not tell the full story of your event, their importance cannot be denied. Documenting the way your event was planned and implemented helps you identify areas in the process that worked well and lessons learned to apply in the future. When collected over time and examined year-over-year, trends may emerge that could be used to report improvement (e.g., increased

attendance, increased sponsorship) or challenges (e.g., less media coverage, drop-in promotional activities).

A few recommended measures to document (perhaps in a spreadsheet) include:

- Event logistics (e.g., location, theme)
- Description(s) of event activities
- Description(s) of community engagement during the planning process
- Number/names/types of sponsors engaged
- Number/names/types of partners engaged (healthcare, public health, other)
- Amount of funds raised for event/from whom
- Attendance numbers (adults/youth)/Reach numbers (if virtual event, flyers, etc.)
- Number of staff members needed, roles, full-time equivalents (FTEs)
- Number of press releases written/where sent/published
- Media coverage descriptions/recordings (e.g., news, radio, TV, other)
- Methods of other promotion (i.e., what type, where, reach)

Typically, these measures will help you create brief sound bites and infographics about how your project was implemented. But what about measuring impact?

Measuring Impact

Measuring the outcomes and impact of your event can be trickier than measuring implementation, and the methods for evaluating them are dependent on factors that are sometimes out of your control due to limited staff and resources and other factors.

Because of the wide variety of perspectives and story angles available for describing your event, it is important to think about the most important two to three questions you and your stakeholders need or want to know the answers to in order to best illustrate the impact of your event, while considering staffing and resources needed to collect those stories in the most impactful way. It can be helpful (and is often advisable) to ask your various stakeholders what they would like to know about the event. Pick a few short and understandable questions or topics that would provide clear evidence of the impact to share with leadership, partners, sponsors and the community.

Some sample questions to use to capture stories include:

- How did you hear about the event today? Who is here with you today? (Pose these questions to anyone attending the event.)
- What have you enjoyed the most about the event? In which activities have you participated?
- What have you learned so far from attending the event? Any new activities or other knowledge? Has anything surprised you?
- Would you have changed anything about the event?

- How do you feel attending this event encourages you to focus on health and wellness in your parks/recreation center? Will you incorporate any new health and wellness activities into your routine?
- Tell us a story about how you have included in your daily routine a health and wellness activity in your local park or recreation center.
- How do park and recreation centers contribute to your health and wellness journey?
- What is your favorite health and wellness activity in a park or recreation center? Why?
- Ask any other questions that will draw stories about the event and connect parks and recreation to health and wellness. *Include some questions for staff members and sponsors/partners that may also spur some interesting stories about the impact of your event.*

You can select from a variety of methods to collect stories about your event. Depending upon your most important identified questions and available resources, some may be more feasible than others. A few ideas for story collection are below, but countless creative ideas are possible.

- Conduct short (three to five questions max.) surveys addressing all perspectives that are administered by walking around the event and asking attendees, quick reference (QR) Codes, social media posts, paper or online surveys at a booth, etc. Be sure to include open-ended questions.
- Roam around and ask questions about the event to participants on video (intercept surveys/interviews). *A bonus of this method is the possible use of these videos for event promotion the following year — be sure to have participants sign consent forms when necessary if you are using photos or videos of them!*
- Encourage participants to post pictures or videos from the event on social media using hashtags. Ask them to share a story along with the picture or to answer a specific question in videos. Pull the stories from the posts.
- Provide some sort of education for children or adults where they draw pictures or create something related to the health/wellness education provided or about their favorite activity at the park. Take pictures of their creations.
- Erect a wall, poster boards or other object so participants can write a short message or draw a picture of their favorite thing to do with their families in the park or how they feel when they are active with their families. Maybe ask them to draw their families doing what they do together. Transcribe or photograph the quotes or use pictures to summarize the crowd's answers. This also can be effective using post-it notes on a wall.
- Ask a multiple-choice question with two to three possible responses, each represented with a jar. Ask participants to put a ball or some other object in the jar that represents their response. Tally the percentage of responses in each jar.

- If possible, offer a small incentive for people to draw, write or answer a few questions related to the event and provide their name and contact information on it to be entered into a drawing for the incentive. Or, you could give everyone who contributes a small token incentive.

The last step is to communicate your results to all stakeholders and interested parties. Be sure to use concise ways — like infographics — to organize your most important findings. Use stories to answer the questions that you and your stakeholders decided to explore about the event. Include pictures and videos to tell a story that will leave your audience feeling inspired and connected. If a challenge arises that needs to be communicated, always include how you may change the program to improve results the next time.

Always remember, evaluation should not feel like judgement — it is an opportunity to collect useful information for successful future planning and for accurately showing off the impacts of your hard work!

Share With NRPA

We want to hear about your Family Health & Fitness Day! NRPA will be releasing a post-event survey in the coming months to gather information around the campaign’s impact and reach. Be prepared to share the following data, if possible:

1. Types of activities at your event
2. Number of participants at your event
3. Number/name/type of partners engaged in your event and how they were involved in promoting and fostering activities
4. Number/name/type of sponsors engaged in your event
5. Pictures/videos/stories of your event.

Sample Timeline and Checklist of Activities

We know you are busy. We’ve put together a timeline of activities to make it easy to integrate your Family Health & Fitness Day communications into your calendar.

Week	Activity
May 5-11	<ul style="list-style-type: none"> • Plan your communications for your Family Health & Fitness Day event. • Begin writing your communications for your event. • Include information about Family Health & Fitness Day on your website. • Include the Family Health & Fitness Day event in your email communications. • If one of your events requires pre-planning for the attendees, like a 5K, you can begin sharing on social media one month ahead of the event.

May 12-18	<ul style="list-style-type: none"> ● Continue writing your communications for your event.
May 19-25	<ul style="list-style-type: none"> ● Share 2-3 social media posts per channel to promote your event.
May 26-June 1	<ul style="list-style-type: none"> ● Send news release to newspapers. ● Invite print reporters to attend event with media advisory. ● Share 2-3 social media posts per channel to promote your event.
June 2-7	<ul style="list-style-type: none"> ● Send news release to TV/radio stations. ● Invite broadcast/radio reporters to attend with media advisory. ● Share 2-3 social media posts per channel to remind people to attend your event.
June 8-Day of Event	<ul style="list-style-type: none"> ● Amplify attendee posts on social media.
June 9-15	<ul style="list-style-type: none"> ● Send post-event news release to outlets that didn't attend. ● Share 2-3 social media posts per channel about the outcomes of your event. ● Include photos and a short description of your event in your email communications/newsletter. ● Fill out NRPA's post-event data collection survey to share your impact with us!

Register Your Event With NRPA

Looking for additional support as you promote your Family Health & Fitness Day event? This year, NRPA will be compiling a list of Family Health & Fitness Day celebrations to share with park users across the country! This list will live on NRPA's website to provide park users with a centralized location to view and discover events being held in their local communities on June 8.

Do you want your organization's event included on this list? Simply complete this brief survey to share your agency's name and event information with NRPA!
